Notes:

- Base Maps have loaded firmware, but all zeros for timing and fuel corrections, and are intended for vehicles that will get custom tunes
- Safety Maps have loaded firmware, but are intentionally too rich and have too little timing, and are intended to provide a safe starting point for dyno tuning.
- 1. "All Cat/B" means the map is compatible with "All Cat-back" exhaust systems
- 2. If a specific OEM's part is indicated, the Map was designed for that part only and has not been tested on other comparable parts
- 3. JCW is the John Cooper Works kit from BMW
- 4. SC means Super Charger
- 5. RAPS is the Ram Air Performance System for the Toyota Tundra
- 6. UDP is a supercharger underdrive pulley
- 7. A/B is Axel Back exhaust
- 8. ZEX Dry NO2 kit, 75 shot, 34 PSI fuel pressure
- 9. T/B is Throttle Body
- 10. CA is for California Emissions; Non-CA is for 49-State Emissions
- 11. SR stands for Short Ram
- 12. Turb/B Means Turbo back exhaust.
- 13. MS stand for MazdaSpeed
- 14. Com/T stands for Comptech
- 15. Calibration for 7 PSI boost and 75 PSI fuel pressure
- 16. Calibration assumes fuel pressure with vacuum line disconnected is 75 PSI
- 17. For any application with two part numbers, the first is for kits sold w/o the PDA hardware (3rd digit "2") while the second part number is for kits sold with the
